

# Digital Product Passport & Tracing: projects joining forces -1<sup>st</sup> ICCS Digital Product Passport event

## CONCLUSIONS

- Over 260 Registrations resulting in over 150 Participants joining today at peak
- Great need for clustering in the DPP domain
- Numerous initiatives existing, we have seen today different approaches
- Need for common approach - what to take into account - some aspects mentioned today
  - The importance of data model interoperability at different levels
  - Data availability/skepticism in sharing information remain a challenge/rethinking transparency needs
  - Data reliability - how to assure the data is authentic (use of verification tools, double step verifications)
  - User friendliness
  - Flexibility, different aspects
  - DPP might be seen as another burden on companies → EC looking into burden reduction (e.g. DPP data re-use)
  - Necessity for information, raising awareness across stakeholders,
- Need for combined methodologies e.g. DPP and sorting systems, integration of sensors
- Growing interest in the DPP for food sector as well
- Several opportunities approaching for further discussions - 2<sup>nd</sup>
